

# Low Bay

**LB**

For environments that require vertical and high horizontal illumination, U-LI Goodlite offers a range of Metal Halide and High Pressure Sodium Low Bay fittings that address these requirements.

Model	Wattage	Dimension of Fittings		
		Length L	Width W	Height H
LB 250	250W	600	360	180
LB 400	400W	600	360	180

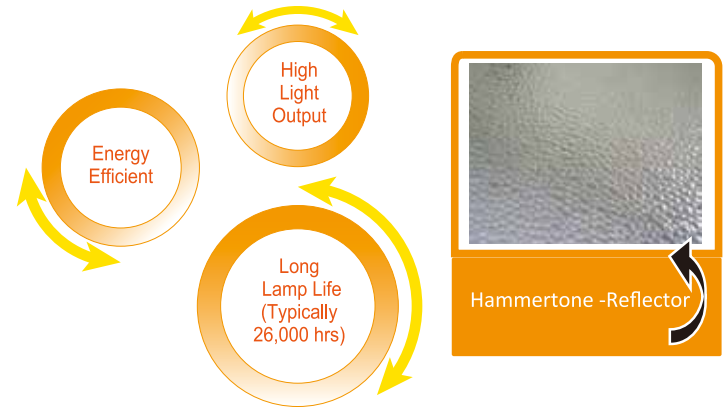

Recommended for mounting heights below 20ft and best suited for long period of use as they have a "restrike" period after being switched off.

LB with Tempered Glass

LB with WireGuard

	Sodium (SON) Lamp	Metal Halide (HQI) Lamp	Mercury Vapour (MBF) Lamp
Colour	Yellow-Orange coloured as in street lamp.	White light that is crisp.	Pleasant white light not as crisp as metal halide but not amber like sodium lamps.
Distinctive Feature	Offer higher light output to lamp wattage than other HID lamps and thus suited to large storage area where true colour light is not important.	Crisp white light offers clarity and high light output.	Long life, low cost and reliable lamp.
Areas of application	For a large storage areas especially agricultural use where colour is not important.	Assembly area, bench and machinery works where true colour is required.	Large retail outlet.
